SPECIAL RULES AND REGULATIONS – UNLIMITED

ITEM	SUBJECT	APPLICATION

RULES AND CHARGES GOVERNING
DIVERSION AND RECONSIGNMENT

ITEM	SUBJECT	APPLICATION
200	Definition of Reconsignment or Diversion	The term "Diversion" or "Reconsignment" (used interchangeably in this tariff) means any change requested by consignor, consignee or owner which requires a change in billing or an additional movement of the car, or both, including stopping a car in transit. The term "in transit", as used in this Tariff, means prior to actual or constructive placement for unloading by the billed consignee. Actual placement is made when the car is placed on the track of the consignee. Constructive placement applies when actual placement is prevented by any cause attributable to consignee.
205	Conditions	<ol style="list-style-type: none"> 1. A shipment which has "broken bulk", i.e., has been partially unloaded, at the original destination, cannot be reconsigned. 2. An order for reconsignment cannot specify a particular time for execution. 3. If a request is made for a reconsignment, Carrier will make a diligent effort to locate the shipment and effect the reconsignment, but will not be responsible for failure to do so unless such failure is due to the negligence of its employees. 4. Orders for reconsignment must be made or confirmed in writing. 5. Carrier will only agree to reconsign a car which has not been delivered to another railroad.
210	Stopping in Transit	<ol style="list-style-type: none"> 1. When a car is ordered stopped in transit and is later ordered to continue under its initial billing, the charge in Item 230 A. (1), A. (2), B. (1), B. (2), C (1) or C (2), as appropriate, will be assessed. 2. When a car is ordered stopped in transit and is later reconsigned, the charge in Item 230 A. (1) and A. (2), or B. (1) and B. (2), or C. (1) and C. (2), as appropriate, will both be assessed.
215	Freight Rate Applicable	The through rate to the new destination is the rate from original point of origin to that destination applicable via the reconsigning point. If the through rate from origin to the new destination does not apply via the reconsigning point, then an out-of-route charge in Item 250 will be assessed to a point intermediate from origin to the new destination.
220	Level of Rates and Charges	The level of the reconsigning charges in Item 230 and the charges in Item 250 will be determined as of the date of the reconsigning order. The level of the through rate from origin to the new destination will be determined as of the date of shipment from the origin.

Detention time begins with the time the car arrives, except that when the car arrives prior to receipt of the order to hold the car, detention time will begin with the time the order is received. Detention time ends at the time the reconsignment order, or an order to release the car from being held, is received. (See Exception) 2. Cars reconsigned after actual or constructive placement for unloading by the billed consignee will be subject to detention charges after 24 hours free time.
